

Team Feedback Report 1

SOBER BITS SY COMP

1. What theme have you decided for your project?
 - The theme for our project is Open Innovation.
 - We are going to try text compression using Huffman encoding
2. What is your problem statement?
 - The problem statement is to create a prototype that can compress large files so that it is easy to transfer them.
3. What is the scope of your project?
 - To give a text file and then get the compressed file.
4. What data structure have you decided to use and why?
 - We have decided to use priority queue.
 - Also, we have used binary trees.
5. Have you started working on your project and what all did you accomplish in the past 2 weeks?
 - We have made a basic outline of the program
 - We have decided what functions and classes we are going to use and make.
 - We have decided upon the data structures too.
6. Did you face any problems in these 15 days and were you able to resolve them?

We are facing a few issues in creating the correct tree for the Huffman encoding but we are working on it and we will resolve it soon.
