Feedback Report Part-2

1. What tools are you using for making the project for example: eclipse, jframe, etc?
We are using Intellij, Git,Github and atom.io

2. Have you made any changes to the data structure you have selected? If yes then why?
Yes. Initially we had used arrays to store the entire data then we used  linked list but finally there were different types of data we stored it by creating a new data file where all the data is stored

3. What is the progress of your project? What all have you accomplished in these 2 weeks?
We were able to successfully setup all the requirements of the project. We were also able to implement the required data structures successfully.

4. Did you face any problems in these 15 days and were you able to resolve them?
Yes we had issues storing the data after runtime. So after discussion with our mentor we were able to store data by generating a new file with extension .data that stores the data even after runtime

5. Did you make any major changes in the Project?
Yeah we changed a lot of data structures during executions.
